2.3	Storage and sharing	3

1 Purpose

This document explains what data is generated when using SKOV systems, how it is stored, and how you can access it — in line with the EU Data Act.

2 General

2.1 Data generated

When you use SKOV digital systems, the following types of data are created:

- **Technical data:** device ID, connection logs, firmware version
- **Production data:** temperature, feed and water supply, air quality, animal growth, etc.
- **User activity data:** login times, settings, actions within the app

Some of these may include personal data, which is handled in accordance with our [Privacy Policy](#).

2.2 Data access

You can get access to your data by contacting us:

 service@skov.com  +45 7217 5555

2.3 Storage and sharing

Data are stored securely on servers **within the EU**.

Service providers (e.g., Datadog, Google) may process data under SKOV's instructions.

Data are **not sold** to third parties.
